

SAQIB KHAN

Aspiring AI & Data Science Developer

+92 343 2048645 • iamsaqibkhan.edu@gmail.com • linkedin.com/in/saqib1-khan- • github.com/SAQIBKHAN1020

PROFESSIONAL SUMMARY

Aspiring AI & Data Science Developer with hands-on experience in Python, Data Analysis, Machine Learning, and NLP. Built and deployed 3+ end-to-end AI/ML projects achieving up to 90%+ model accuracy, with practical exposure to data preprocessing, model training, and web-based deployment using Streamlit and FastAPI.

PROFESSIONAL EXPERIENCE

AI & Data Science Apprenticeship | Saylani Mass IT Training
Months

Apr 2025 – May 2026 | 12

- Completed a 1-year intensive AI & Data Science training program covering Python, Data Analysis, Machine Learning, and NLP across 100+ hours of practical assignments.
- Built and deployed 3 ML-based applications using Python libraries, Streamlit, and FastAPI, improving model accuracy by up to 15% through feature engineering and tuning.

AI and Data Science Intern |

Jun 2026 – Present

- Gaining practical experience through real-world AI and Machine Learning projects and industry-focused tasks.
- Applying Data Science concepts to build and deploy NLP and automation-driven AI applications using Python.

KEY PROJECTS

Fake News Detection System

Technologies: Python, Pandas, NumPy, Scikit-learn, NLTK, TF-IDF, Streamlit

- Developed an NLP-based machine learning system to classify 5,000+ news articles as Real or Fake with over 90% accuracy.
- Performed data preprocessing, text cleaning, and feature extraction using TF-IDF Vectorization on a large text corpus.
- Trained and evaluated multiple machine learning classification models using Scikit-learn, comparing performance across 3+ algorithms.

Prompt Response Database Query system

Technologies: Python, Pandas, NumPy, Scikit-learn, NLTK, TF-IDF, Streamlit

- Developed an NLP-based machine learning system to classify 5,000+ news articles as Real or Fake with over 90% accuracy.
- Performed data preprocessing, text cleaning, and feature extraction using TF-IDF Vectorization on a large text corpus.
- Trained and evaluated multiple machine learning classification models using Scikit-learn, comparing performance across 3+ algorithms.

Sentiment Analysis System

Technologies: Python, TensorFlow/Keras, NLP, Pandas, NumPy, NLTK

- Developed a deep learning-based sentiment analysis system to classify text as positive or negative with 85%+ accuracy.
- Performed text preprocessing, tokenization, and data preparation for model training on thousands of text samples.
- Built and trained a neural network model using TensorFlow/Keras across multiple training epochs.

Intelligent Learning & Student Performance Prediction System

Technologies: Python, Pandas, NumPy, Scikit-learn, Streamlit, FastAPI, Plotly

- Developed an AI-powered system to predict student academic performance.
- Built an interactive dashboard for performance analysis and insights.
- Implemented Machine Learning models with personalized learning recommendations.

TECHNICAL SKILLS

Programming: Python, SQL

Data Analysis: Pandas, NumPy, Data Cleaning, Data Visualization

Machine Learning: Scikit-learn, Model Training, Model Evaluation

Deep Learning & NLP: TensorFlow, Keras, NLP, NLTK, TF-IDF

Deployment: Streamlit, FastAPI, REST API

Tools: Jupyter Notebook, VS Code, Git, GitHub

EDUCATION & CERTIFICATIONS

Intermediate — Computer Science | Govt Inter Boys College Landhi-4 (Ongoing)

Artificial Intelligence & Data Science Course

Saylani Mass IT Training — Completed 1-year training with practical assignments and real-world projects in Python, Data Science, Machine Learning, and AI.
